

# Extending XPS Beyond SAP GUI

## pXPS Delivers XPS Functionality from Your Desktop

SCT has extended the functionality of its SAP based shipping software, XPS, with a browser based solution, pXPS. Now users can take advantage of XPS features without logging into SAP. pXPS is accessible from any browser enterprise-wide and is available to all employees, not just SAP users.

### Ease of Use

Employees no longer have to navigate multiple carrier websites. pXPS users have the ability to create shipping requests for any carrier through one user-friendly portal. The intuitive user interface streamlines the shipping process while increasing efficiency.

pXPS users can manage batch shipping, shipment tracking and label printing all from a single browser interface.

Personal user profiles aid in minimizing data entry and improving data accuracy while simplifying the shipping process and reducing human error. The addition of cost centers in the user profile also helps ensure the accurate allocation of shipping costs.

### Integration

Although users are not required to access SAP, pXPS is fully integrated and all shipments are stored in the SAP system. Since all of the data resides in SAP, pXPS shipping information is easily reportable and auditable allowing for greater control with less risk and fewer variables.

pXPS can be easily tailored to a company's unique requirements. Business rules can be applied to ensure alignment with current shipping procedures. With pXPS, there is no workflow disruption and manual processes are minimized.

### Key Benefits

- › Process shipments from a web page outside of SAP
- › Create shipping requests and labels from your desk
- › Eliminate the need to access third-party carrier sites
- › Access real time shipping status without logging into SAP
- › Integrate with GTS to facilitate export compliance checks

### Core Features

- › Batch processing
- › Dangerous Goods shipping
- › Domestic and international shipping
- › Generate carrier labels from browser
- › Attach documents
- › Maintain local address book
- › Cost center assignment

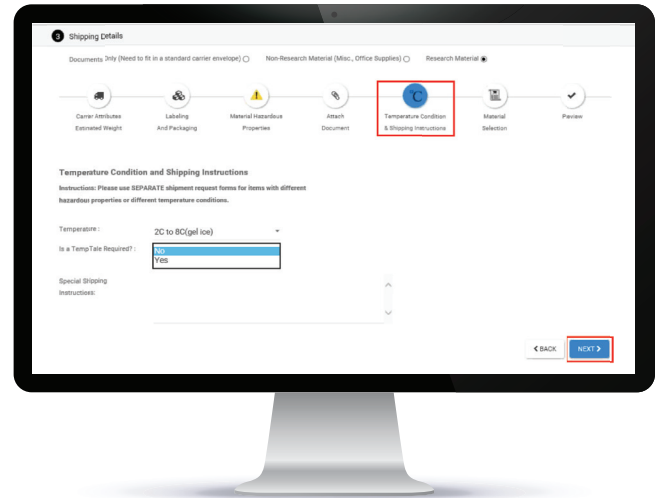

# Compliance

## Dangerous Goods

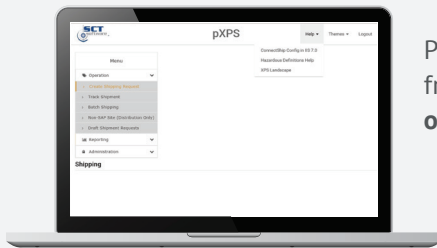

pXPS supports and automates the processing of Dangerous Goods. The workflow-based design guides users through a step-by-step process facilitating the proper declaration of Dangerous Goods information. This information is added to the shipping request so the Dangerous Goods items can be properly packaged and labeled in the warehouse or mailroom.

## Exports

pXPS seamlessly supports international shipping. Built-in GTS integration meets all export compliance requirements and pXPS generates all necessary documents.

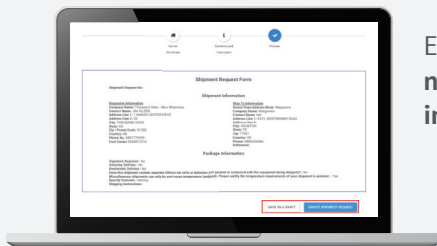

## pXPS delivers the rich functionality you need with the simplicity you desire.

Process shipments from any browser outside of SAP.

Simply upload spreadsheets from your computer for easy batch shipping.

Easy to use intuitive navigation and integrated help.

Generate and download shipping reports with the push of a button.

## About SCT Software

SCT Software is a leading provider of innovative logistics execution software servicing the SAP® user community. SCT software solutions are used globally by manufacturers and distributors to streamline the logistics process. The company's products give customers increased visibility ensuring supply chain efficiency. Using SCT solutions, customers gain a competitive edge by reducing overall operational cost, improving customer service levels and increasing profitability. Focused exclusively on complimenting SAP® logistics capabilities, SCT solutions enable customers to leverage the investment in their SAP® landscape while providing best-of-breed functionality.
