

XPS

Multi-Carrier Packing & Shipping for SAP Logistics

Execution layer for SAP-driven shipping and carrier compliance

From SAP Planning to Carrier-Compliant Execution

XPS Add-On For SAP Logistics Management (LGM)

LGM plans. XPS executes.

- > Real-time parcel and LTL rate retrieval
- > Service level options returned to LGM
- > Carrier-compliant shipping and labels
- > Support for export and dangerous goods

OPTIMIZE

- Real-time rate shopping
- Routing guide execution
- Carrier/service selection

PACK

- SAP-based packing (HU-driven)
- ECC, S/4HANA, EWM integration
- Delivery consolidation

EXECUTE

- Carrier-compliant labels and documents
- Domestic and international shipping
- Tracking number generation

INTEGRATE

- Shipment confirmation back to SAP
- Tracking stored in SAP
- Freight cost mapped to SAP TM

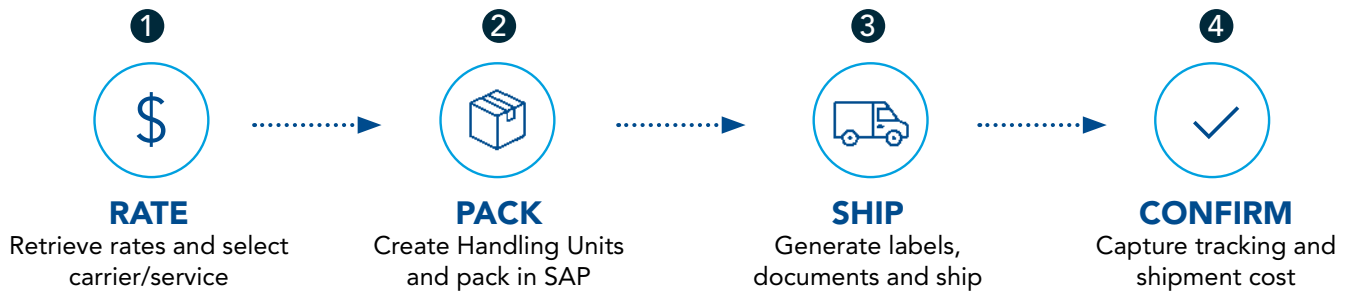

Business Outcomes

- > Unified multi-carrier execution inside SAP
- > Reduced manual shipping processes
- > Increased warehouse throughput
- > Improved freight cost control

Global Multi-Carrier Coverage

- > Parcel, LTL, and regional carriers
- > Domestic and international shipping
- > Integration via APIs and carrier-compliant services
- > Scalable onboarding of new carriers

How XPS Works

> PLANNING INTEGRATION

- Real-time carrier data supporting SAP TM, SAP S/4HANA, and LGM
- Carrier service, transit times and determination
- Accessorial cost modeling (fuel, residential, etc.)
- Supports multi-modal and multi-carrier planning

> SHIPPING EXECUTION

- SAP-based packing (HU-driven where applicable)
- Carrier-compliant shipping and labeling
- Manifesting (where needed)
- Tracking number generation and storage
- Actual shipment cost captured

> ADAPTABLE EXECUTION FRAMEWORK

- Supports SAP-driven execution (TM, EWM, S/4HANA, LGM)
- Supports external fulfillment environments
- API-enabled integration via SAP BTP services
- Consistent execution across all channels

CORE VALUE

XPS brings multi-carrier shipping execution directly into SAP, standardizing rating/carrier determination, packing, and shipping while ensuring carrier compliance and real-time integration across your logistics processes.

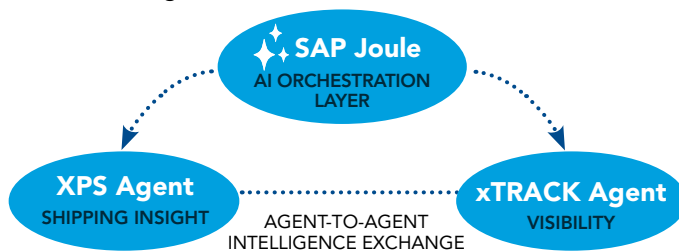

BUILT ON SAP BUSINESS TECHNOLOGY PLATFORM (BTP)

- Clean core aligned extension
- No custom carrier integrations inside SAP
- API-driven architecture
- Scalable to support global multi-carrier execution

SCT Intelligence Agents Powering SAP Logistics

SAP Joule orchestrates and interacts with SCT Intelligence Agents while enabling XPS and xTRACK agents to exchange real-time intelligence.

One Intelligent Ecosystem. Real-Time Intelligence. Better Decisions.

About SCT Software

SCT Software delivers SAP-centric logistics solutions that extend SAP Transportation Management, SAP Extended Warehouse Management, SAP S/4HANA, and SAP Business Network with advanced cartonization, multi-carrier shipping, visibility, and carrier integration solutions. SCT is an **SAP Endorsed App partner with Premium Certified integrations**, with solutions built on SAP Business Technology Platform.

SCT Solutions Include:

- **CSO** – Advanced Cartonization
- **XPS** – Multi-Carrier Packing and Shipping
- **XPS for LGM** – Execution for SAP Logistics Management
- **pXPS** – Portal Solution for Shipping
- **xTRACK** – Multi-Modal Visibility and Parcel Invoice Integration
